

PROWLER ULTRA 4.3

SPEED STABILITY PERFORMANCE COMFORT

The Prowler Ultra 4.3 represents the next level of innovation in Kayak Fishing. This kayak takes all the best features from the globally successful Prowler Ultra 4.7 and adds 5 new key innovations to make this kayak the benchmark in kayak fishing design.

The Hull Design

This kayak has truly outstanding hull characteristics, speed, stability yet it is extremely nimble and responsive.

5" Inch Hatch

This allows you to easily access under the seat area for battery placement in the boats centre of gravity.

New Seating System

Built in thick foam base for a super comfortable ride, essential for those long fishing trips. Four position seat back.

Extra Rod Holders

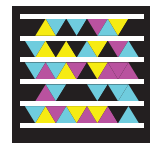

2 Moulded-in flush mounted rod holders in the protected zone behind the paddler.

New Transducer Scupper Hole

Specially designed to take a range of fish finder brands (including Humminbird and other brands) and models including side imaging.

Click-Seal Hatch

The front hatch is the only practical place to stow a trolley on a fishing kayak. One quick click and your gear/trolley is stashed and locked away without having to fit a neoprene cover.

Kayak safety - 100% waterproof inserts

All saddles, handles and other fittings are attached using the 'insert' attachment system. Unlike rivets and screws, moulded-in 'inserts' are 100% waterproof.

Multi functional reversible hatch cover

Position 1 : Attachment points for fish finder and other accessories. Rotate hatch cover (to protect fish finder)

Position 2 : Fish finder in protected storage for surf conditions

Key Specifications

Length : 4.3m

Weight : 27kg*

Width : 74cm

Capacity : 195kg

* unruddered

PROWLER ULTRA 4.3

Solid robust lifting handles (will not snag fishing line)

Flat area for fitting a VHF or GPS antenna

Bungee for storage of equipment on deck

Flared bow efficiently sheds water for a drier ride

Moulded-in inserts for either a Cannon® or Scotty® rod holder

Multi functional reversible hatch cover

2 x flush mounted gunwale rod holders

Built-in side lifting handles

Paddle holder x 2

4 x Rear flush mounted rod holders

Large deep tank well designed to specifically take the new Ice Box Storage Pod

Recessed deck fittings

Solid built-in lifting handle

2 flat areas for flags or aerial attachments

Moulded-in insert points for rudder bracket attachment. Standard anodised Ocean Kayak rudder with foiled rudder blade (not shown)

PROWLER HULL

Very fast without compromising stability, excellent glide characteristics. Tracks exceptionally well and the flared bow is efficient in shedding water. Regarded as a very quiet hull (minimal hull slap).

It's how your kayak performs in those unexpected but demanding conditions that really matters (head winds, big seas). This is where the performance of the Prowler hull comes into its own.
