

Trident Ultra 4.7

New for 2011

First introduced in New Zealand and Australia the Trident Ultra 4.7 is a collaboration between Ocean Kayak designers and a group of dedicated professional kayak anglers from around the globe. Based on the Trident 15 and crafted around the original Prowler hull, Ocean Kayak designers have taken the Ultra 4.7 one step further by incorporating more volume in the front of the boat for a drier ride, moderate rocker to help performance in ocean swells and a more pronounced tail fin to aid in tracking.

Features

- Comfort Deluxe™ seat back
- The multifunctional reversible center hatch cover
- Live bait well or anchor storage compartment
- Carefully thought out mounting and storage systems for all of your fishing accessories
